New Soft Collision Technology

(Schofield, WI) RightAngle Products announces the introduction of GyroSense Soft Collision technology to its line of height adjustable tables.

RightAngle is one of the first manufacturers in the industry to feature the GyroSense sensors. A gyro senses angular velocity and changes in orientation and rotational motion. The GyroSense helps prevent the adjustable height table from crushing hard stops, such as a coffee cup, arm on a chair, or a file cabinet, and soft items, such as a tissue box. The GyroSense stops the movement of the desk and reverses course before causing damage.

Overload relays protect the motor by monitoring current traveling to the motor. If the incoming current exceeds the designed amperage, the overload protection shuts the motor down before any damage occurs.

“We’ve been working towards a soft collision system since we started manufacturing height adjustable desks,” said Bill Knighton, president of RightAngle Products. “The GyroSense dramatically reduces the possibility of damage to your desk and other equipment. Our video highlights the absolute difference between our table with GyroSense technology versus a competitor’s product that uses anti-collision based on amperage.”

Visit raproducts.com/gyro to watch the video.

The GyroSense technology is now a standard NewHeights™ feature, available on the Elegante, Eficiente, Bonita, and Presidente height adjustable tables.

“When organizations request information for proposals, they rarely include any safety requirements,” said Knighton. “Low-quality furniture manufacturers cut corners to keep their prices low. As a result, collision safety is an unknown factor in our market. The GyroSense helps eliminate those concerns.”

One Touch

With this upgrade in technology, a One Touch option is also available on our 4-button programmable switch. The One Touch is a touch-and-go feature that automatically adjusts the table to its pre-programmed heights.

About RightAngle Products

RightAngle has developed products for more than twenty-five years utilizing the highest standards of design, engineering and production practices. Included in the product line are; NewHeights height adjustable workstations, R-Style™ office furniture, and a complete line of RightAngle ergonomic accessories.

RightAngle’s facility is located at 6703 Zinser Street, Schofield, WI 54476. For more information visit raproducts.com, contact customer service at [800.298.4351](tel:800.298.4351) or email info@raproducts.com.
